

Stronger together for Nature Recovery

Align your work with a shared vision for the Chilterns

Why this matters now

Working together at scale is essential to reverse nature's decline. Recovering biodiversity can also contribute to shared goals, including public well-being and resilience to climate change.

The Plan

The Nature Recovery Plan provides a shared evidence base and framework to coordinate action, maximise impact and track progress.

What this means for you

Aligning your work with the Plan strengthens funding bids, partnerships and long-term outcomes.

Local Nature Recovery Strategy (LNRS)

Each area has an LNRS identifying priorities for nature recovery across Buckinghamshire & Milton Keynes, Oxfordshire, Hertfordshire and Bedfordshire.

Find your local LNRS map on the Nature Recovery page on our website.

**Chilterns
National
Landscape**

What you can do

- Share the Plan with your audiences
- Align projects with recovery priorities
- Use the Plan to guide strategy and inspire and inform positive action
- Support monitoring and shared outcomes
- Collaborate on landscape-scale action

Scan to explore the Nature Recovery Plan and find your local LNRS map

The Plan describes the special qualities of the Chilterns National Landscape that relate to nature recovery. It also outlines the priority outcomes that we can all work towards. Use this Plan to support your strategic decision-making and action around nature recovery.

Need support or advice?

If you'd like support in aligning your plans with the Nature Recovery Plan, contact us at office@chilterns.org.uk or visit our website: www.chilterns.org.uk
